

Job Title - Sourcing / Procurement Manager – Chemical Industry

Location- Thane- Kapurbavadi

Working Days- 6 days- (2 sat Off)

Role Overview

Lead the sourcing of lab raw materials—such as APIs, excipients, lab-grade solvents, and impurities. Negotiate prices, manage suppliers, support product development, and Material Procurement as per the material technical datasheet and available chemical standards

Core Responsibilities

- **Sourcing & Vendor Development**
Identify, evaluate, and onboard reliable suppliers. Handle RFQs/RFPs and negotiate pricing and quality terms.
 - **Cost Control & Market Monitoring**
Track market trends, compare vendor quotes, and drive cost-saving decisions.
 - **Cross-Functional Coordination**
Work with R&D, QA, production, and logistics to validate and approve new materials.
 - **Contracting & Vendor Management**
Manage contracts, monitor supplier performance, and maintain clear documentation and reporting.
-

Required Qualifications & Skills

- **Background: Bachelor's in Chemistry, Chemical Engineering, Pharmacy, or similar.**
- **Experience: 2+ yrs in chemical procurement or sourcing.**
- **Core Skills:**
 - **Sharp negotiator**
 - **Basic Knowledge of ISO norms of procurement process would be an added advantage.**
 - **Effective vendor manager**
 - **Strong in analysis, market research, and cost benchmarking**
 - **Good communicator, collaborative, and detail-oriented**
