

PURCERT STANDARDS

2023

PurCert Standards, developed by PureSynth, are a specialized collection of high-quality GC standards designed to meet the diverse needs of chromatographic and analytical applications.

PurCert GC standards from PureSynth are completely synthetic and typically over 99.5% pure by GC-FID. Identifications determined by GC-MS, FTIR and ¹H NMR and reported in the certificate of analysis of each manufactured lot. PurCert GC standards are traceable to the current lots of the United States Pharmacopeia (USP), or to European Pharmacopoeia (EP) and British Pharmacopoeia (BP) if available. PurCert provides characterisation data along with CoA for each solvent with following reports:

- Purity by GC -FID
- Identification by GC-MS, IR, ¹H NMR spectrum
- Water (KF) & Impurity profile
