

PurCert

Standards for Ultimate Precision: Trusted, Chosen, Reliable

Setting the Benchmark

PurCert offers a comprehensive portfolio of high-purity standards developed to support accurate calibration, method validation, system suitability, and quality control across a wide range of analytical platforms — including GC, GC/LC-MS, ICP, IC, AAS, titration and more.

Manufactured under ISO certified facilities and rigorous quality systems, PurCert standards ensure consistent performance, regulatory compliance, and confidence in your analytical results — batch after batch.

A comprehensive portfolio:

Our certified standards are formulated to deliver high performance across a wide range of analytical methods and regulatory frameworks.

Below is a detailed breakdown of our offering:

Category	Testing Applications
Primary/Secondary RS for GC / GC-MS	<ul style="list-style-type: none"> • Volatile organics, residual solvents & headspace analysis solutions. • High stability, certified concentrations, and multi-component options available.
Pharmaceutical Secondary Standards (CRMs)	<ul style="list-style-type: none"> • Alternative to pharmacopeial primary standards (USP/EP/BP) • Fully characterized • Designed for use in API assays, impurity profiling, and method validation
API Impurities	<ul style="list-style-type: none"> • Characterized impurity standards for APIs. • Supports ICH Q3A/B compliance

Category	Testing Applications
Volumetric Standards	<ul style="list-style-type: none"> • Ready-to-use certified primary standards • Strict volumetric accuracy for high precision titration
FAME Standards	<ul style="list-style-type: none"> • For profiling in biodiesel, food products, and lipid research • Certified composition, ideal for GC-FID applications
Turbidity Standards	<ul style="list-style-type: none"> • Compatible with all major nephelometric instruments
pH Buffer CRMs	<ul style="list-style-type: none"> • Certified buffers across the full pH range
Pesticide Standards	<ul style="list-style-type: none"> • Multi-residue standards compliant with food safety regulations (EU, EPA, Codex) • Ideal for LC-MS/MS and GC-MS workflows
Density Standards	<ul style="list-style-type: none"> • High-purity density standards for pycnometers, densitometers
Conductivity Standards	<ul style="list-style-type: none"> • Conductivity solutions from 1 $\mu\text{S}/\text{cm}$ to 100,000 $\mu\text{S}/\text{cm}$ • Packaged for long-term stability
IC Standards	<ul style="list-style-type: none"> • Cation and anion standards in single or mixed formats
ICP & ICP-MS, AAS Standards	<ul style="list-style-type: none"> • Certified elemental solutions for metals analysis • Includes single- and multi-element standards

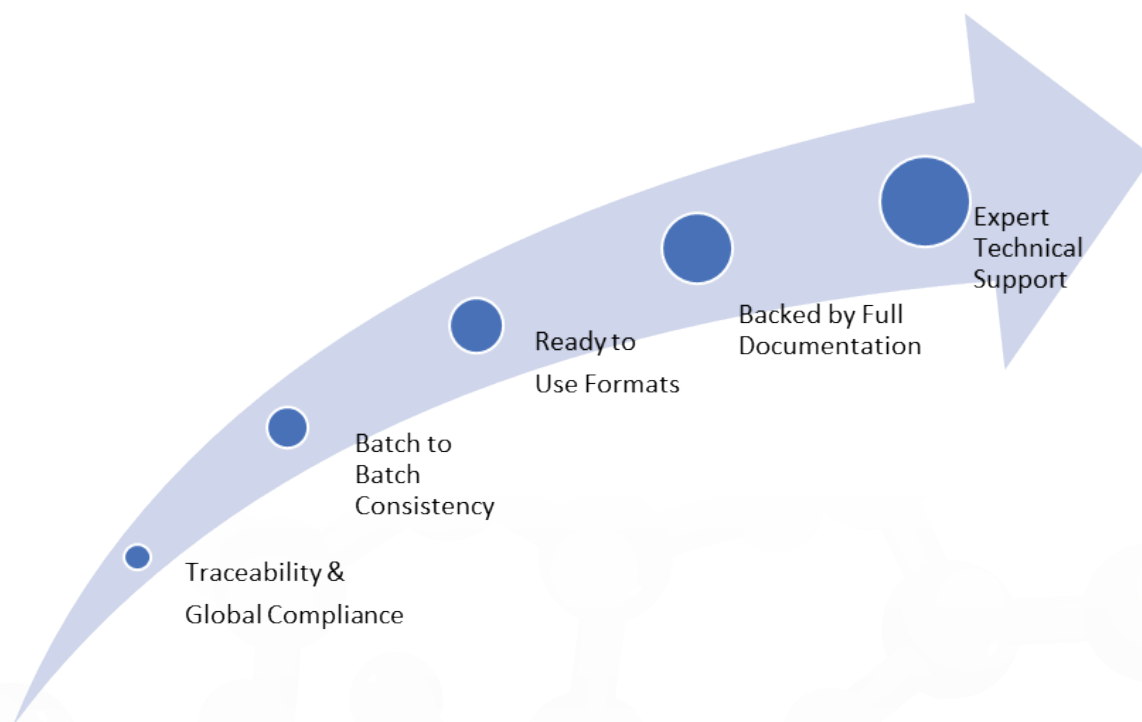

*Full traceability with accompanying **Certificate of Analysis (COA)** and **Safety Data Sheets (SDS)**.*

***Custom formulations** are available upon request.*

Applications Across Industries

*Pharma | Biotech | Food & Beverage | Research | Diagnostics |
Testing Labs | Academic*

Where Our Standards Make the Difference

Custom Synthesis

Need something specialized?

We offer custom-formulated CRMs, matrix-matched solutions, and complex multi-analyte standards tailored to your specific methods or regulatory needs.
